

# THE BREEZWAY IDEAS BOOK

# Altair<sup>®</sup>

## Louvre Windows

We think that Breezway Louvre Windows are the best type of window available. They're stylish, versatile, energy efficient and totally customisable. We hope that by the time you've finished reading through this brochure, you'll agree with us.

### Through this brochure you'll find:

- Ideas on how Altair Louvre Windows can enhance your home,
- Information on the energy efficiency of Altair Louvre Windows and
- Guidance through the various customising options available.

We are available to answer your questions, chat through your needs or suggest a local Breezway preferred dealer. So visit our website [www.breezway.com.my](http://www.breezway.com.my) today for more information.

### They don't make louvres like they used to

Louvre windows have changed significantly since we began manufacturing them in the late 1940's, but they are still a practical and stylish window choice.

### Key features:

- Open wide to maximise ventilation in comparison to other window types.
- Monsoon tested for wind and water to ensure maximum performance.
- Energy rated to suit various climates.
- Improved options available including security bar systems or easily fitted security or insect screens.
- Manufactured exclusively from non-corrosive materials.
- Award winning Altair Powerlouvre Window with concealed motors.
- Each window is made to order, allowing the widest choice of customising options.
- The Stronghold System pins louvre blades in place to provide extra strength and safety in areas around the home that require added protection.

**Free air** in every room of your home. Keep your home comfortably cool, almost every day of the year, simply by opening it up. **Altair Louvre Windows** help you to create a living space that works with nature rather than against it. Altair Louvres can also be left open in gentle rain and can be cleaned from inside the building (handy for multi-storey homes).

*breezway*  
A JELD-WEN Company

**Altair Louvre Windows** in the **lounge room**

ought to be compulsory. Okay, we're a little biased about that. But think about it. Is there a better, more stylish way to have complete control of the air flowing through your living area?

What every **bedroom** needs is a breath of fresh air. And the best way to get lots of fresh air inside is with **Altair Louvre Windows**. Concerned about wind and rain? The patented 'living hinge' design of Altair Louvre Windows ensures that, when fully closed, they seal tight to provide superior wind and water performance.

Steam is good for locomotives, but not so good in your **bathroom**. Install exhaust fans if you wish, but really, the best option is to include **Altair Louvres** in all your wet areas to let in fresh air and light.

*breezway*<sup>®</sup>

If you can't stand the heat get some louvres in the **kitchen**.  
Not only will they allow cool, fresh breezes in but they will  
get rid of cooking smells and help dissipate the heat of your  
next hot pot.

Are you looking to renovate your home or enclose an outdoor area to make it more functional, regardless of what time of year it is? **Altair Louvre Windows** are the new-age, stylish window choice that can also be used to create **extra living space** and extend your outdoor time. Designed for tough Asian weather conditions, Altair Louvres open fully to allow fresh air in, yet seal tight to ensure protection from the elements.

# Powerlouvre™

## Windows

Personal jet packs, holidays on the moon, windows that automatically open to cool your home, then close up in conjunction with other household equipment when you leave the house. The first two are still a way in the future, but **Altair® Powerlouvre™ Windows** are available now in heights up to 2.7 metres and 4 metres wide. Powerlouvre Windows can be controlled by the Apptivate Control Unit to ensure a comfortable living environment.

A standard sized, touch sensitive wall switch for easy use. Single touch to fully open, fully close or open to an intermediate position.

Single and dual channel models available. Can operate multiple Powerlouvre Windows for maximum ventilation.

Bluetooth® Smart module to permit control by compatible smartphones and tablets with a range of approximately 10m – 20m.

An in-built temperature sensor allows rooms to be naturally cooled or windows closed automatically to retain warmth when required.

Pre-set timers allow windows to be automatically set to operate in anticipation of the building occupant's daily routine.

'Night mode' allows the brightness of the LED light to be adjusted to minimise potential sleep disruptions.

“An award winning, sleek and elegant solution to electronically control your Altair® Louvre Windows.”

# Stronghold™ System

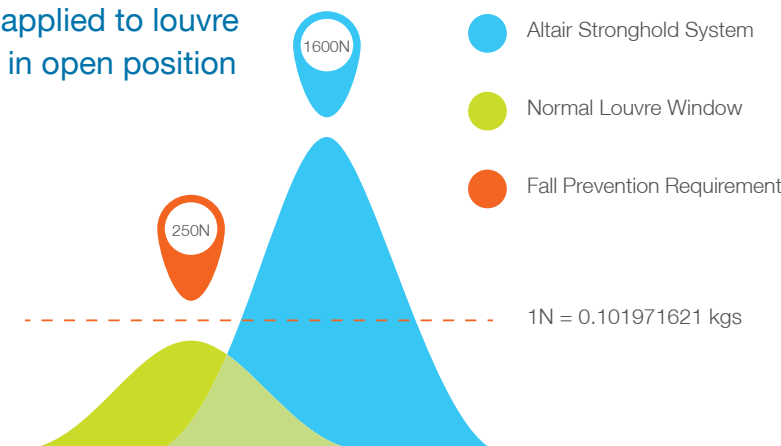

The revolutionary Stronghold System mechanically retains glass or aluminium louvre blades. It is the ideal option for windows installed more than two metres above ground level that require fall prevention or any other room within the home where added strength is important to keep your family safe.

Altair Louvres with the Stronghold System optimise ventilation through the entire window opening. Ventilation through other window types is greatly reduced when their openings are restricted to 125mm to comply with the Fall Prevention requirements of the Building Code of Australia.

The Stronghold System is available in widths of up to 1200mm, can be screened, and offers privacy options when using aluminium blades. This is well suited to wintergarden applications by enclosing balconies or outdoor areas to make the most of extra living space. Occupants can enjoy the winter sun in a protected spot or take advantage of fresh breezes.

**Altair® Louvre Windows with the Stronghold™ System** are now the logical inclusion when extra strength and safety is required in residential dwellings or balcony enclosures.

**Load applied to louvre blade in open position**

Maximises natural ventilation where windows require fall prevention or extra strength.

# Easyscreen™

## Window System

The Breezway **Easyscreen™ Window System** is an aluminium framing option that offers external screening for **Altair® Louvres**.

The Easyscreen Window System is built for strength and durability. It provides homeowners the option to include insect or security screens to the outside of their louvres which can deter bugs or intruders from entering the home. Powerlouvre or manual control options are available.

“An aluminium framing system suitable for **OUTSIDE** screen applications.”

# Slimline™

## Window System

Featuring modern architectural lines, the **Slimline™ Altair® Louvre Window System** has been developed to suit narrow frame applications or installation into concrete block construction when screening is not required.

The Slimline Window System is a great option for installation near doorways or in internal walls to allow fresh air to circulate throughout the house and encourage better breeze-paths to keep your home feeling comfortable. By using aluminium or frosted glass blades you can provide privacy and the tight sealing of Altair Louvres means that conversations can remain private.

“An aluminium framing system suitable for **NARROW** frame applications.”

# Aluminium

## Blade Finishes

**Altair® Louvre Windows** have a variety of aluminium finish options to suit the needs of end users. Aluminium is virtually maintenance free, can't rust and never needs painting. Our **aluminium frames and blades** are offered in a range of powder coated colour and anodised finishes.

White Powder Coat

Selecting the right powder for the atmospheric conditions of the site and correct maintenance will be critical to the ongoing appearance of the finish.

**Note:** Industry accepted colour variation can occur during the aluminium anodising process.

A wide range of **POWDER COATED COLOUR** and **ANODISED FINISHES.**

# Glazing

## Glass Options

**Altair® Louvre Windows** have a wide variety of **glazing options** to suit various climatic conditions. In warm climates a primary consideration is to reduce the amount of hot sunlight that enters the home through the windows.

Silk Screen Glass

Allows a soft light into the room while retaining your privacy.

Clear Glass

Full views and maximum natural sunlight.

Low E Glass

Improves the insulating properties of the glass in cold or mixed climates.

Blue Tinted Glass\*

Bronze Tinted Glass\*

Euro Grey Tinted Glass\*

Dark Grey Tinted Glass\*

Light Green Tinted Glass\*

Dark Green Tinted Glass\*

\* Works best to reduce solar heat gain. Beneficial in hot climates.

# Selection Guide

## STEP 1 FRAME

When selecting your frame think about the design, colours, maintenance level and energy requirements of your home. There is a wide selection of frame colours to choose from, with options to suit varied applications. Ask your Breezway preferred dealer to show you the choices available.

### Aluminium

Aluminium frames are low maintenance and can be powder coated in many colours or simply anodised.

### Timber

Timber frames create a warm feeling when used throughout your home. Timber conducts very little heat, making it an energy efficient option.

### Mesh Screens

Insect and security screens can be fitted to the outside of Breezway Window Systems. Speak to your dealer for other compatible systems.

## STEP 2

## DESIGN

Breezway offers a range of sizes and shapes to provide greater flexibility within the home. Altair Louvres can also be used within internal walls as room dividers to improve cross ventilation and building comfort through better airflow.

## STEP 3

## BLADE TYPE

With Altair Louvre Windows you can choose blades that best suit the window's function. i.e. maximising views, letting in/reducing sunlight, reducing glare, gaining privacy or creating your own design style.

152mm

102mm

### Added strength & safety

Altair Louvres with the Stronghold System mechanically retain glass and aluminium blades so you can gain the benefits of full ventilation and safety.

The pin secures the blade to the bearing and clip from inside.

### Aluminium

Low maintenance, can't rust and never needs painting. Offered in a large variety of powder coats including decowood.

### Glass

Clear, obscure, or tinted blades available for enhanced views and energy efficiency.

STEP 4

CONTROL

Whether you prefer pulling a handle, pushing a button or operating an App, Breezway has a louvre window perfect for you. Handle positions can be varied depending on the frame type for each individual requirement.

Powerlouvre

Motors concealed within the head of the frame.

Apptivate

Bluetooth compatible with in-built temperate and timer.

Standard

Fit the contours of the human hand for easy use.

Low Profile

For installation within some bi-fold and sliding doors.

Ring

For out-of-reach applications operated by a map rod.

Altair®

Louvre Window Standard Heights

This chart indicates standard window heights corresponding to the number of full blades used in standard Breezway Louvre Window frames. For window heights differing from our standard dimensions, a fixed blade can be added to accommodate the difference.

\* For gallery height only, subtract 10mm from these standard heights.

For Powerlouvre™ Standard heights

	Easyscreen™ Window System heights (Screens fitted to outside of frame)		Slimline™ Window System heights		Galleries/Strip Hardware only including Weatherstrip*
